

British Youth International College

YOUTH EDUCATION IS TOMORROW'S SUCCESS

Founder & Chairperson

Dr. Rashmi Mantri holds a PhD from the University of West of Scotland where she received a 'one of its kind' scholarship! She is affectionately addressed as Dr. Rashmi by her students, which, she thinks, has a nice ring to it. Having worked as an educator and in community development for over 15 years, she believes that the world can be changed through youth education.

She strongly believes she has the best job in the world! Kids start at the British Youth International College without having seen an Abacus before, nor any coding experience and hiccups in speaking English confidently. On such a background, to see them master the techniques, progress the levels, and enjoy working so hard truly brings her utmost joy.

Witnessing her students develop such confidence and watching parents getting involved at every step of the way is nothing short of magic.

However, there is another cherry on the top. The finest aspect of the BYITC community lies in the fact that it was founded by Dr. Rashmi Mantri and her son, Dhruv Maheshwari. The foundation has been designed meticulously for all students by exceptional teachers, without forgetting the importance of all parents.

After great success in the UK, US, Australia, & Middle East, we are now in India to welcome you into our family!

Vasudhaiva Kutumbakam!

Dr. Rashmi Mantri

“Youth is tomorrow's future and if they have the right direction then a country can achieve its full potential.”

Here, at British Youth International College, we are dedicated to teaching your children invaluable skills in different areas such as Abacus, English, and Coding.

We teach kids in multiple age groups starting from 4 years old to 17 years old via e-learning through our online software. The courses have been designed keeping in mind the school development programs.

We also provide Abacus teacher training and Abacus teacher certification at British Youth International College, UK. We welcome school partnerships as well. Our course content has been created by Cambridge certified teachers who are experts in their respective domains.

We welcome school partnerships.

Our Courses

Abacus

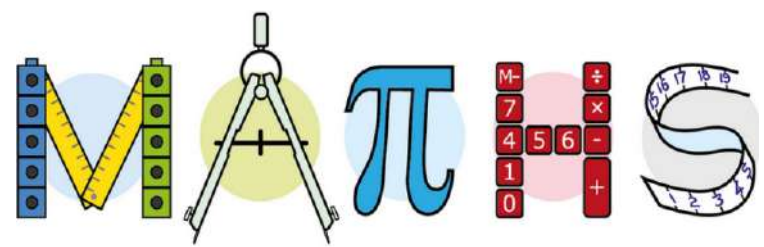

English

Computing

*Present a lifetime gift that will make your child
5 times smarter.*

Our Offerings

$$\begin{array}{c} 2 > -3 \\ 0.999... = 1 \\ \pi \approx 3.14 \\ \sqrt{2} \\ 5^2 \\ 1 + 2 \cdot 3 \\ (1 - 2) + 3 \\ 5(2 + 2) \\ 101_2 = 5_{10} \end{array}$$

Finger Theory

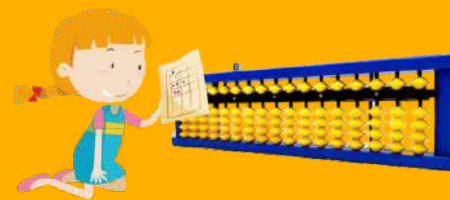

Mental Theory

Abacus Technique

Mastering Arithmetic

Abacus Tool

English

The British Youth International College is dedicated to its mission of enabling children to develop and acquire skills for a brighter tomorrow. ***Our English language curriculum has been designed by Cambridge certified professionals*** to ensure that your child benefits from the very best our institute has to offer.

As a universal language, English has become a requirement in most careers. The fields of business, trade, politics, science, and healthcare have increasingly stressed upon the need for communication, and being fluent in English is an advantage that cannot be ignored.

Our English language programme, designed for children and adults alike, aims to enable students to master the English language while learning, how to effectively use the language for academics and communication.

Our Offerings

Reading Comprehension

Grammar

Vocabulary & Spelling

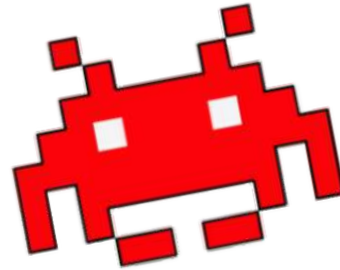

Creative Writing

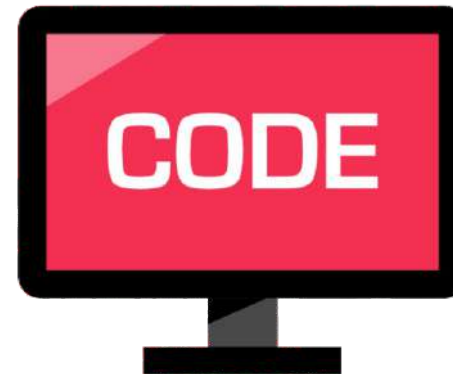

Confidence Building

Computing

Here, at British Youth International College, we are dedicated to teaching your children invaluable IT skills in different areas such as software, hardware, games development, web development, graphic design, and many more. We offer weekly computing classes for 9 to 17 year-olds which run alongside the school terms, in **4 blocks of 12 weeks each.**

The motive of this course is to teach the youth 'how to think' rather than 'what to think'.

Our Offerings

Game Based 2D/3D Modelling
Online (using blender creator)

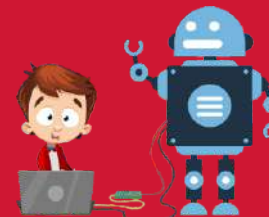

Game Based Coding

Build Your Own Gaming PC

Online Javascript/Python/C#
Programming

Robotics

Other Activities

Abacus Teacher Training Program

After School Club

School Programme

Benefits of our courses

Abacus

BYITC Abacus Maths classes help kids to learn Abacus quickly & efficiently and to develop deep concentration and patience within them!

- Learning Maths with fun and excitement
- Deep focus and patience
- Memory Development
- Confidence Building
- Brain development
- Mastering arithmetic
- Sharpen concentration

English

Our institution advocates the learning experiences of the child as much as the result itself. Some of the proven benefits to learn English includes

- Learning Content
- Qualified teachers
- GK and Research
- Technology based learning
- The most structured way of learning
- Fun and engaging way of learning
- Improves Focus & Engagement
- Interactive & learner centric
- Strong Feedback & testing Process
- Online Web based learning with live instructor
- Quality learning in a quality environment
- Group based / one to one assessment as required

Computing

We help the student learn how to think creatively, work in collaboration, and reason in a systematic manner. Some of the proven benefits to learn games based coding online include:

- Expands creativity
- Learn how to think differently
- Learn how to solve problems
- Develops resilience against challenges
- Learn how to have fun with Computing

Testimonials

Lee

“ It is fun because you get to make your own website and you get all the help you need, it's very useful and it's very clear on what you need to do to make a really ”

Aditi

“ It was really good learning how to make a website, I liked coming to the class, it is the first time I've joined classes like this and I would come back. I learned more about how computers work as well, I really enjoyed the course. ”

Swara Shimpi

“ She has shown her potential by improving her reading comprehension massively since she joined and has put a massive effort in improving her work and spellings. Swara is more than ready to be in the next level. ”

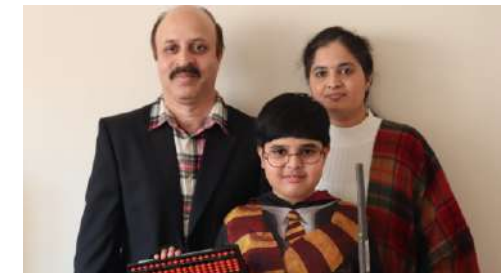

Umar Mahmood

“ Umar's writing and spellings have been brilliant from the past few months. He has put a lot of hard work in his creative writing skills and has been very imaginative. He has put thought into each short story he has created and his punctuation is perfect! ”

Kieran Singh

“ Kieran has benefited a lot from abacus as he is now capable of doing large sums in a small amount of time. He is also great at his time-tables and thanks to Abacus, Kieran finds math a lot easier in school. ”

Samarth Kesthur

“ Abacus helped Samarth to become faster & accurate in Maths. The courses improved his problem-solving skills, which helped in boosting his confidence. ”

Why choose us?

Our Vision

To help young adults build the right learning foundations for a successful future & bringing back the fun in learning.

Our Mission

To provide the best in class learning tools & experience to every student in an interactive & creative environment. We believe in creating & imparting the right content tailored to the requirements of our students.

Our Values

Founded by a mother and an educator, BYITC believes in nurturing kids to exceed their full learning potential.

B Best in class
Y Youth
I Innovative
T Teamwork
C Caring

Our Strategy

We break up our program into terms throughout the year and each term consists of approximately 12 classes taught over 3 months. Each class is upto 2 hours long and there are multiple schedules to choose from.

This allows your child to learn easily, effectively, and focus on their program to the best of their ability. If you would like to know more about our program or like to enroll your child in our program, please contact us.

Media Recognitions

BYITC is proud to be recognised for its achievements.
