YOUTH EDUCATION IS TOMORROW'S SUCCESS

Founder & Chairperson

Dr. Rashmi Mantri holds a PhD from the University of West of Scotland where she received a 'one of its kind' scholarship! She is affectionately addressed as Dr. Rashmi by her students, which, she thinks, has a nice ring to it. Having worked as an educator and in community development for over 15 years, she believes that the world can be changed through youth education.

She strongly believes she has the best job in the world! Kids start at the British Youth International College without having seen an Abacus before, nor any coding experience and hiccups in speaking English confidently. On such a background, to see them master the techniques, progress the levels and enjoy working so hard truly brings her utmost joy.

Witnessing her students develop such confidence and watching parents getting involved at every step of the way is nothing short of magic.

However, there is another cherry on the top. The finest aspect of the BYITC community lies in the fact that it was founded by Dr. Rashmi Mantri and her son, Dhruv Maheshwari. The foundation has been designed meticulously for all students by exceptional teachers, without forgetting the importance of all parents.

After great success in the UK, US, Australia, & Middle East, we are now in India to welcome you into our family!

Vasudhaiva Kutumbakam!

Dr. Rashmi Mantri

“Youth is tomorrow's future and if they have the right direction then a country can achieve its full potential.”

Introduction

Here at British Youth International College, we are dedicated to teaching your children invaluable IT skills in different areas such as software, hardware, games development, web development, graphic design, and many more. We teach kids in a couple of age groups, aged 9 – 13 years old, 14 – 17 years old.

What we do

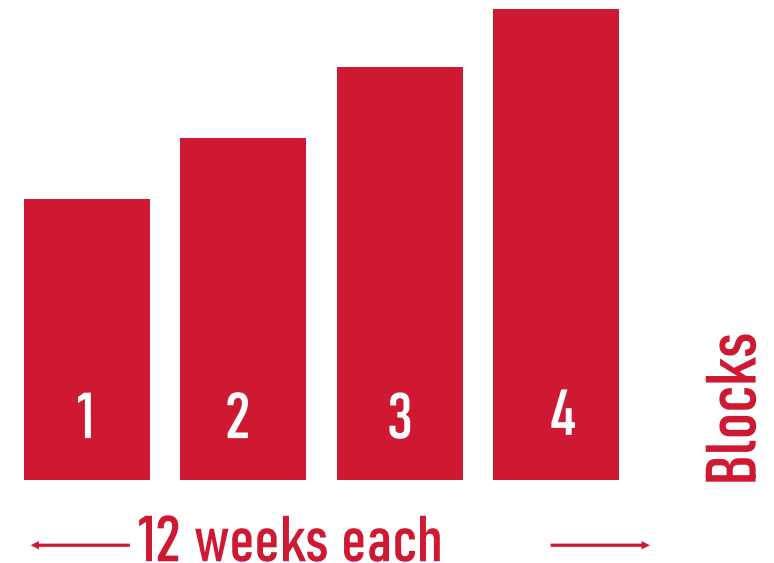

Every kid is a genius. In today's world, there's nothing a child can't do. From coding to website designing or game development, no domain is now limited to just adults. We can see children overshadowing adults in all these areas. The trick is to start when you're young.

Through our online instructor led learning, we offer a good blend of technical knowledge with important life skills, creativity, interactive education, team-work, and project-based learning.

The motive of this course is to teach the youth 'how to think' rather than 'what to think'.

9-17 years

Our Offerings

We are pleased to offer kids weekly computer coding classes for 9 to 17-year-old kids which run alongside the school terms, in 4 blocks of 12 weeks each.

Game Based 2D/3D Modelling
Online (using blender creator)

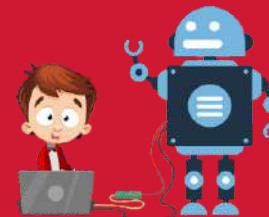

Game Based Coding

Build Your Own Gaming PC

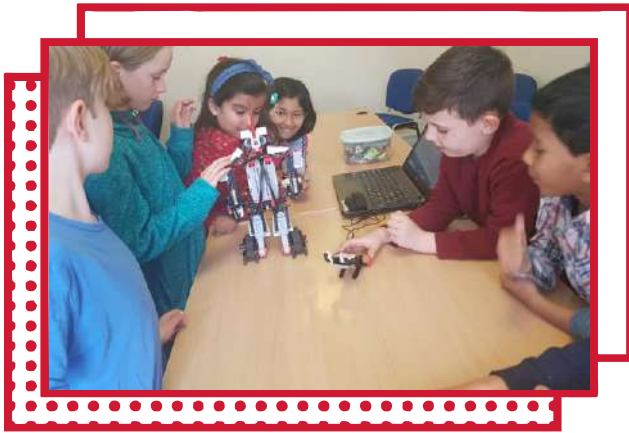

Online Javascript/Python/C#
Programming

Robotics

Other Activities

At British Youth International College, kids will learn programming and experience deep-end coding. We are committed to working with local communities to improve educational opportunities for children and teenagers.

After School Clubs

Kids Summer Holidays Computing Camp

School Programs

Robotics

With the world pushing onward to a future where the internet is everywhere and artificial intelligence tells us how to live our lives, now is a great time to introduce your child to robotics.

Here at the British Youth International college, we provide beginner robotics classes. Our hands-on classes offer an exciting look into programming robots via the wonderful world of software development and computer programming.

Why BYITC Robotics Classes?

- Opportunity for children to develop their skills in logic building.
- Expand problem solving and rational thinking which are key areas for the development of a young mind.
- Giving child an overview and insight into the key S.T.E.M skills.
- Learning the fundamentals of robotic coding in a 3D virtual environment.
- The courses are designed by experts to give your child a great learning experience.

Our Vision

To help young adults build the right learning foundation for a successful future & bring back the fun in learning through e-learning via our online software.

Our Mission

To provide the best-in-class learning tools & experience to every student in an interactive & creative environment. We believe in creating & imparting the right content tailored to the requirements of our students.

Values

Founded by a mother and an educator, BYITC believes in nurturing kid to exceed their full learning potential.

What are the Benefits of Learning to Code?

Some of the proven benefits to learn games based coding online include:

- Expands creativity
- Learn how to solve problems
- Learn how to think differently
- Develops resilience against challenges
- Learn how to have fun with computing

Testimonials

Jessica

“

I enjoyed the course because it gave me a chance to achieve something new and master a new skill. It teaches me lots of things I didn't know about computers and programs and I am very grateful to be in it. I rate it 10/10!

”

Maria

“

I really liked the course and making a website has helped me use my imagination and I can use anything on it like colors, pictures and any kind of text. I really had fun with it as I can go crazy with unlimited colors.

”

Roman

“

It's a really fun web course. It is very customized. You can do whatever you want to do with your website. When we see the actual code written in notepad++ into the browser it looks amazing and I absolutely enjoyed it.

”

“ **Jas**

I like this club because I learn how to code websites with HTML, so when I am older I can have a job making games and I will be really proud of it.

”

“ **Onyii**

I like the club because I get to make a website about things that I like and I get to learn how to code. I will be proud when I grow up to see what I created on the internet.

”

“ **Sunny**

I like the fact that we use laptops. The thing I like about this program is that we make websites and link them together, also the fact that we added pictures in our websites, and we can make our own websites and link them! I love this club a lot.

”
